

# Benefit from the advantages of GSS 2000

GSS  
2000

## Efficient operation

The turntable allows simultaneous preparation, heating and cooling of the shrink fit chucks.

**Subsequently, there is no waiting time, tool clamping is seamless and with maximum efficiency.**

## All under control

Practical locations and compartments provide room for accessories such as stop discs or gloves in close proximity to the equipment.

**Thus all the necessary components are always at hand.**

- > **High-performance spindle**, hence quick change time
- > **Overheating protection** for holder
- > **Automatic mode** possible (equipment automatically selects the correct heating program)
- > **Error detection** choosing wrong chuck/program
- > **Heating programs** for standard/reinforced and very small holder/shrink fit extensions
- > **Maximum rigidity**
- > **Highest cutting rates**
