Special solution HR 500 G carbide- or cermet-tipped high-performance reamers - special designs

Carbide- or cermet-tipped HR 500 high-performance reamers are available in preferred sizes as standard range. In addition we manufacture special tools to customer specifications on request.

The flexible system of HR 500 G high-performance reamers also allows designs with shrunken head for a larger penetration depth. Guhring can also provide head designs for very small reaming depths. this special solution can be clamped in all current hydraulic chucks and shrink fit chucks.

Design with shrunken head
