

H Regeneration service

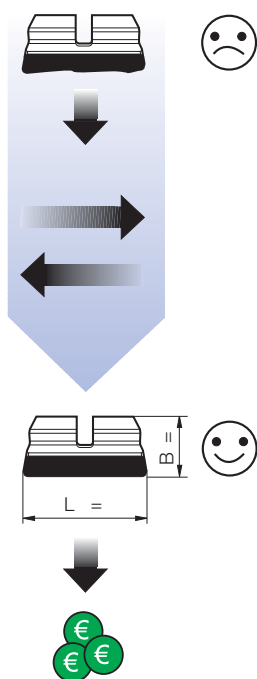

Hollfelder-Gühring services

for PCD- and PCBN-inserts

Thanks to our regeneration and regrinding service we can guarantee a long-term and constant application of your tools on the highest level.

Compared to new inserts the original grinding guarantees a constant quality of your workpieces and a constant tool life.

Regeneration service

1. credit note for returned inserts about 20% of the original price

2. Invoicing of the new inserts

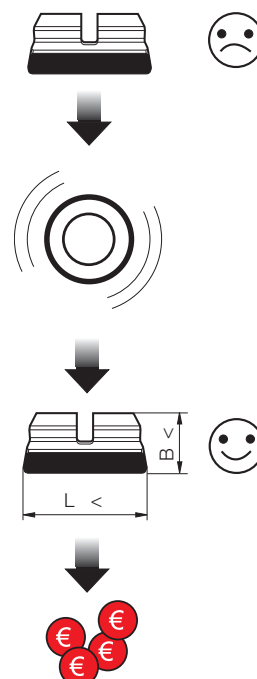

Inserts can be sent for regeneration in the quantities desired.

Advantage:

- short flow time
- constant tool dimensions (L and Ø D)

Regrinding service

Invoicing of the regrinding costs

We recommend to send us the complete set of inserts of one cutter for regrinding. Experience has shown that inserts can be reground three times at a maximum. However the wear pattern should not exceed 0,1 mm per regrinding!

We are always at your disposal for further information.
